## REMARKS/ARGUMENTS

This response is submitted within the shortened statutory period of three months to respond to the office action dated February 26, 2004. Therefore, no petition and fee for extension of time is filed with this response.

Please note that item 4 in the Office Action Summary in the outstanding Office Action is incomplete. Item 4 should list all of the claims that are pending in the above-identified U.S. application. Specifically, item 4 should indicate that Claims 1, 3, 4, 9, 13-15, and 18-58 are currently pending in the above-identified U.S. application. In the next Office Action, the Examiner is respectfully requested to indicate that Claims 1, 3, 4, 9, 13-15, and 18-58 are currently pending in the above-identified U.S. application.

Please enter the amendments and remarks in this response into the prosecution history of the subject application without prejudice or disclaimer.

Hereinafter, the claims that are pending prior to the entry of the amendments in this response are called "currently pending claims". This response amends currently pending Claims 39-42 and 44-51, 53 -57. No claims are added or canceled with this response. Upon amendment the above U.S. patent application will have 3 independent claims (currently pending Claims 1, 31 and 32) and a total of 48 claims (currently pending Claims 1, 3, 4, 9, 13, 14, 15, 18-38, 43 and 58, and amended Claims 39-42 and 44-

57). The applicant previously paid for 48 total claims and 3 independent claims.

Therefore, no fee for excess claims is due with this response.

### 1. Objections to the Specification

The specification from page 10, line 13 to page 57, line 22 has been amended to separate the ingredients with a comma between the ingredients. The specification as amended now has the proper punctuation and spacing; and, therefore, the objection to the specification in the outstanding Office Action should be withdrawn.

### 2. Objections to the Claims

Currently pending Claims 45-47, 50 and 57 were amended to separate the ingredients with a comma between the ingredients. Amended Claims 45-47, 50, and 57 now have the proper punctuation and spacing; and, therefore, the objection to Claims 45-47, 50, and 57 should be withdrawn.

### 3. Rejection of claims 39-57 under 35 U.S.C. 112, second paragraph

The Examiner rejects currently pending Claims 39-57 under 35 U.S.C. 112, second paragraph, as being indefinite on pages 3 and 4 of the Office Action. The Applicant respectfully traverses these rejections. Furthermore, these rejections are now moot and

should be withdrawn because Claims 39-57 are not indefinite, as explained below.

1. Re: Claims 39-57.

Claims 39-57 were amended to recite the active ingredients and to finish the listing with an "or" before the last ingredient in the claims. Therefore, Claims 39-57 are not indefinite.

2. Re: Claims 56 and 57

The Examiner rejects claims 56 and 57 under 35 U.S.C. 112, second paragraph because the Claims contain on page 47 the expression "Vitamins A, B, C, D, E and K and derivatives thereof" and on page 94 of the expression "Vitamins D and F and derivatives thereof".

Applicant submits that the expression "Vitamin \_\_ and derivatives thereof" is a well known standard expression. The person skilled in the art associates with the expression "derivatives thereof" certain compounds and certain limited groups of compounds which are standard derivatives to the recited Vitamins.

Applicant further submits that the USPTO has granted numerous patents with this expression in the claims without further clarification in the specification, which is not necessary. For Example, Applicant refers to US Patent No. 6,716,441. Claim 1 of U.S. Patent No. 6,716,441 recites "...Vitamins B<sub>3</sub>, B<sub>5</sub>...Vitamin C and derivatives thereof". The

specification does not include any clarification of derivatives of Vitamins B<sub>3</sub>, B<sub>5</sub> and C.

It is believed the Examiner's rejection is overcome in view of this explanation.

Accordingly, reconsideration and examination of the present application is respectfully requested.

The application is now in condition for allowance. Allowance of the application at an early date is respectfully requested.

The Applicant reserve the right to seek protection for any unclaimed subject matter either subsequently in the prosecution of the present case or in a divisional or continuation application.

This response amends currently pending Claims 39-42 and 44-57. The amendments that are described in the preceding sentence were done to more fully claim the invention and/or to improve the wording of the claims and were not done to overcome rejections under 35 U.S.C. 112, to overcome the prior art, or to overcome any other rejections or objections. The amendments that are described in the first sentence of this paragraph shall not be considered necessary to overcome the prior art, shall not be considered necessary to overcome rejections under 35 U.S.C. § 112, and shall not be considered necessary to overcome any other rejections or objections.

The Commissioner is authorized to charge any additional fees which may be required or credit overpayment to Deposit Account No. 12-0415. In particular, if this Response is not timely filed, then the Commissioner is authorized to treat this Response as including a petition to extend the time period pursuant to 37 C.F.R § 1.136(a) requesting an extension of time of the number of months necessary to make this Response timely filed; and the petition fee due in connection therewith may be charged to deposit account No. 12-0415.

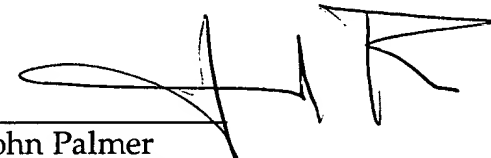

I hereby certify that this correspondence (with all of the indicated enclosures) is being deposited with the United States Postal Service with sufficient postage as first-class mail in an envelope addressed to: Commissioner for Patents, Mail Stop AF, P.O. Box 1450, Alexandria, VA 22313-1450 on
